

A2-B1 Test 2 — EVI Format Practice

Level: A2-B1 | Total: 30 questions | Time: 45 minutes | No dictionary

Format: Same three-task structure as the real EBI English block.

Task 1 (

Task 1 — Matching (Questions 1-6)

Read texts 1-6. Match each text with the most suitable heading (A-H).

There a

- A) A campaign to reduce single-use plastic in the food industry
- B) A study examining the relationship between commuting and wellbeing
- C) An initiative enabling citizens to participate in local decision-making
- D) A programme promoting renewable energy in residential areas
- E) A report on the social consequences of working from home
- F) A scheme to increase the representation of women in STEM careers
- G) An event bringing together innovators to address urban challenges
- H) A project using technology to make public transport more efficient

1. SmartCity Hack is a 48-hour event where teams of engineers, designers, and policy experts collaborate to develop practical solutions to urban problems such as traffic congestion, waste management, and air quality. Prototype solutions are presented to a panel of city officials and investors. Previous winning teams have gone on to launch start-ups funded through the event's partnerships.

2. The TramTrack AI system, recently introduced on four bus routes in the capital, uses real-time passenger data and traffic analysis to adjust timetables dynamically. Early results show a 17% reduction in average passenger waiting times. The city council plans to extend the system to the entire network by 2027.

3. A new national programme will fund solar panel installation for households in low-income areas, covering up to 80% of installation costs. Participating households are expected to reduce their annual energy bills by an average of 600 euros. Applications open in January through local council offices.

4. A national survey of 12,000 workers found that employees commuting more than 45 minutes each way report significantly higher rates of stress, sleep disruption, and dissatisfaction with work-life balance. The negative effects were particularly pronounced among those using crowded public transport. The study recommends further investment in local employment hubs.

5. PlasTake is a certification scheme for restaurants and cafés that have eliminated single-use plastics from their packaging, utensils, and condiment portions. Certified venues display a green badge and appear on a searchable map app. The scheme currently has over 2,400 members across eleven cities.

6. YourVoice is a digital platform allowing residents to submit ideas, comment on planning proposals, and vote on local spending priorities directly from their smartphones. Launched in three

pilot boroughs, it attracted over 50,000 users in its first month. Councillors are legally required to consider any proposal receiving more than 1,000 votes.

Task 2 — Multiple Choice (Questions 7-11)

Text: The Rise of Remote Work

Remote work, once considered a privilege of a few technology companies, has become mainstream across many industries. Since 2020, millions of employees worldwide have experienced working from home, and many are reluctant to return to a traditional office full-time. For employers and employees alike, the shift has revealed both opportunities and challenges.

Productivity studies produce conflicting results. Some research suggests that remote workers complete more tasks per day because they have fewer interruptions and no commute. Others argue that creativity and collaboration suffer when people do not meet face to face. The reality likely depends on the nature of the work — tasks that require deep focus benefit from quiet home environments, while brainstorming sessions and team projects often work better in person.

For many employees, the greatest benefit of remote work is flexibility. Being able to attend to personal responsibilities — a doctor's appointment, a school event, a family matter — without using annual leave is highly valued. Studies show that flexible workers report higher job satisfaction and are less likely to resign.

Companies face different pressures. Attracting talent in competitive markets often requires offering remote or hybrid options. However, maintaining company culture, onboarding new staff, and monitoring performance are more complex when teams are distributed across multiple locations.

7. What has happened to remote work since 2020?

• A) It h

8. What do some studies suggest about remote workers' productivity?

• A) The

9. When does in-person work have an advantage, according to the text?

• A) For

10. What do flexible workers report, according to studies?

• A) Hig

11. What challenge do companies face with distributed teams?

• A) Em

Task 3 — Gapped Text (Questions 12-30)

Read the article. Choose the best word (A, B, C, or D) for each gap.

Social Media: A Force for Good?

Social media platforms (12)_____ transformed the way people communicate, share information, and organise communities. Whether this transformation is positive or negative (13)_____ on how these tools are used.

On the positive side, social media (14)_____ ordinary people to raise awareness of important issues. Causes that (15)_____ might never have received attention — from local environmental problems to global human rights campaigns — have gained millions of supporters thanks to viral posts. Activists (16)_____ that without social media, their movements would have been far less effective.

However, there are serious concerns. Research (17)_____ that young users who spend several hours daily on social media are more likely to experience anxiety and loneliness. This is partly because people tend to share (18)_____ the best version of their lives online, (19)_____ others to compare their own reality with an idealised image.

Misinformation is another major problem. False news (20)_____ more quickly on social platforms than accurate information, largely because sensational content generates more clicks. (21)_____ a story has been shared thousands of times, it is very difficult to correct the record.

Critics argue that social media companies (22)_____ more responsibility for the content on their platforms. If stricter rules (23)_____, harmful content (24)_____ removed before it reaches millions of users.

(25)_____ this, many people continue to find enormous value in social media. It allows them to maintain connections across distances, discover new interests, and access information that (26)_____ otherwise be difficult to find. The key, most experts agree, is to use these platforms (27)_____ rather than passively — being selective about sources and limiting time spent scrolling.

Digital literacy is (28)_____ important than ever. Young people in particular (29)_____ how to evaluate online content critically. Schools and parents share responsibility for (30)_____ this skill from an early age.

Gap	A	B	C	D
(12)	have	has	had	are having
(13)	depends	depend	is depending	depended
(14)	allows	allow	allowed	is allowing
(15)	otherwise	other	another	else
(16)	argue	argued	are arguing	have argued
(17)	suggest	suggests	is suggesting	suggested
(18)	mostly	most	almost	nearly
(19)	cause	causing	caused	causes
(20)	spread	spreads	is spreading	was spreading

(21)	Once	After	Since	Until
(22)	should take	should be taken	have taken	take
(23)	enforced	were enforced	are enforced	enforce
(24)	could be	were	would be	will be
(25)	Despite	Although	However	Because
(26)	would	could	should	might have
(27)	actively	active	action	activating
(28)	more	most	much more	as
(29)	should learn	learns	are learning	learned
(30)	developing	develop	developed	development

Score Guide

Score	Level signal
25-30	Approaching B1 — ready for EVI-like tests
18-24	Solid A2-B1 — continue with B1 grammar drills
10-17	Mid A2 — review passive, conditionals, and connectors
< 10	Return to Strong A2 tests
